ADD Z39.50 HOSTS

ILS has a seamlessly integrated interface that searches any library that is Z39.50 compliant.

INFORMATION REQUIRED TO ADD Z39.50 HOST(S)

1. URL or IP Address
2. Port Number
3. Database Name
4. User ID and Password (if Required)
5. Maximum Number of Records to Return (Max Records)
6. Order in which to search Z39.50 Hosts (Order). If results are found, the search will stop on that host and will not move to the next Z39.50 Host on the list.

ADD A NEW Z39.50 HOST

1. Go to **Administration > Z39.50 Hosts**.
2. Click **New**.
3. Enter the information required.
4. **Default:** Check to set the host to be selected automatically in Z39.50 Search.
5. **Enable:** Check to make this Z39.50 Host visible as an option in the Z39.50 Search feature.
6. **Local:** Check this checkbox if the Z39.50 Host is one that is used locally, not by the union.
7. **Serials:** Check this checkbox if the Z39.50 Host is to be used in the Serials module.
8. **QuickCat:** Check if this Z39.50 Host will be used in the QuickCat feature in **Catalog > Cataloging > QuickCat**.
9. Click **Save.**
10. Click **Test** to test if the Z39.50 host connection is operational based on the information entered.
